Yes, acknowledge in this name:

No, I/We do not wish to be acknowledged on your donor boards.

YOU can make a difference!

Born extremely premature in 2014, Thinesh is diagnosed with Dyskinetic Cerebral Palsy with Failure to Thrive. His condition causes multiple comorbidities like chronic lung disease and developmental delay.

Although both of his parents are working full time to make ends meet, the frequent check-ups and medical treatment required to manage his chronic condition have been straining his family's finances.

Besides his medical treatments, Thinesh also received financial assistance to purchase his wheelchair. Being his main caregiver, his grandmother now finds it easier to bring him to his medical check-ups and treatments, as well as to school at the Rainbow Centre.

"Because of your generosity, we saw a glimpse of hope. He is now showing progress from his treatments. We don't know what we will do without your support. Thank you!"

– Mother of Thinesh, Beneficiary
